

# 24/7 NOT ON MY WATCH

## PRAYER FOCUS

"First responders rush in while others run away from dangerous situations" is a statement familiar to most. Firefighters often encounter tragedy, tremendous loss, and the worst of human suffering. They must remain calm under stressful circumstances. They battle fire but also mental, physical, and emotional fatigue. It is imperative we strengthen the hands of these brave and devoted men and women who serve selflessly for our safety.

## PRAYER POINTS

- For physical, emotional, and mental protection while performing their duties.
- That God would grant peace to the family members who experience anxiety and fear for their love ones.
- That adequate finances would be provided to support the salaries of firefighters and to purchase lifesaving equipment and supplies.
- That they would find favor with the citizens that they come into contact with.
- That they would have courage and acute senses each time they respond to dangerous situations.
- That You would guide them to know where to look and where to go in the midst of fires. Give them eyes to see dangerous areas in advance and ears to hear those who are calling for help.
- That these first responders would know that You are their strength when they become weary and You are their peace when they face their own fears and insecurities.
