PRAYER FOCUS

In Genesis 11, the technology of that day was used by humanity to build the tower of Babel. There were two aspects of human nature at work. We see the power of unity, creativity, and perseverance. We also see how humanity relied on technology and their own abilities instead of God. Today, technology is growing at an exponential rate. Technology can be a curse, or a blessing. Through prayer and God's guidance, we can technology for the good while still depending upon Him as our ultimate source.

PRAYER POINTS

- That we would increase our trust in God rather than trust in technology and data
- For God to inspire His church to use the technological platforms of today in creative ways to take the gospel to the whole world
- That members of the church body would unplug on a regular basis from any technology that takes away time from developing a stronger relationship with God
- That the scientists, engineers, programmers, analysts, and professors of technology who have have turned their ears away from truth would turn their hearts to God
- That plans, funding, and alliances for technology with evil intent would be stopped
- That spouses, youth, and children would keep themselves from viewing pornography or other inappropriate material on their computers and mobile devices
- That children and youth would be protected from online predators
- That parents would put internet safeguards in their home and on their children's devices
