

Tips on Prayer

World Network of Prayer

Believe in your God

Begin your prayer time with praise, thanksgiving, and a time of worship. This creates an atmosphere for God to come near and reminds us of God's power to do anything—even what seems impossible to us.

Believe in yourself

Believe God wants to use you to accomplish His work. Realign your thinking with His Word. Refuse to doubt, ignore the voice of the enemy and your past, and assume your place of spiritual authority.

Be specific

Don't be generic. Think about your request and then ask God in detail what you want. Ask according to His Word so your prayer will be in His will. When He answers, you'll know it was Him.

Have a kingdom focus

Kingdom focused prayer is not about personal success, happiness, or wishes, but the building of God's kingdom. Change your priority and ask God for things that go beyond yourself. Ask Him what He wants you to pray about.
